CAN Protocol NO.	1430
CAN Baud Rate	250K
Charger Receiving CAN ID	0x1806E5F4
Charger Transmitting CAN ID	0x18FF50E5

Communication Specification:

Operation Mode:

- 1. BMS send operating message (Message 1) at fixed interval 1s. After receiving message, charger will work under the voltage and current in the Message 1. If the message was not received within 5s, charger will enter into communication failure and the output will be shut off.
- 2. The charger send broadcast message(Message 2) at fixed interval 1s. The display meter will show the status of charger according to up-to-date information.
